In 2007-2008, the Model Schools Program began to connect with experts around our region to provide educators with access to high-quality professional development focused on a specific topic. This year, the development of the "In the Know" Network will enable us to expand professional development to best utilize our regional experts to support teaching and learning while utilizing various instructional and technology resources.

Contact the Model Schools Office to arrange an expert corporate professional development experience in your district. The district will simply provide the host location and Model Schools will arrange the scheduling, agenda, contract, and invitation to share with district staff. All experiences are encouraged to be hands-on and will allow participants time to create and share classroom ideas and materials. Model Schools Teacher Integration Specialists are available to provide sustained job-embedded support.

*Reserve a few seats to make this regional experience aid eligible.*

Ideas to get you thinking...
