## CALLING ALL TEACHERS AND STUDENTS!

Imagine an aircraft hangar packed with approximately 150 wireless-enabled PCs and MACS connected to the Internet, interactive whiteboards, and student response systems. Technologically inspired teachers and students are showcasing projects using these laptops, interactive whiteboards, student response systems, and other instructional technologies. Visit with them and they will engage

you in interesting conversations about their work process and products. This year our vendors will provide learning enhanced technology product literature to districts and to the Dowling College staff.

Take this opportunity to showcase your most innovative student and teacher work at the Twelfth Annual Celebration of Technology in Education, hosted by the Model Schools Program in partnership with Dowling College at the aircraft hanger of the Brookhaven Campus of Dowling College, May 11, 2012! This all day conference features over 600 students and teachers from eastern Suffolk County. Please join us for this event and share your technology in the classroom *best practices*.

This year's theme is: Learning Effectively and Living Productively in a Digital World. The focus of the Celebration is to provide “live” demonstrations of the instructional technologies that are being used on an everyday basis in local schools to enhance standards-based learning.

## GUIDELINES FOR PRESENTATIONS

### REGISTRATION PROCEDURE:

1. Complete the on-line registration form at: [http://www.esboces.org/ms/cte/cte\\_district.aspx](http://www.esboces.org/ms/cte/cte_district.aspx) by **March 30, 2012**.
2. Please list each presentation separately in the designated area of the online registration form.
3. Please be aware that the Celebration of Technology in Education is a media event. Teachers and chaperones need to be cognizant of any potential issues concerning individual students and the possible use of pictures and video. Kindly refer to local district guidelines regarding media release.

**For questions contact: Cindy Hodun at [chodun@esboces.org](mailto:chodun@esboces.org)**
