Building Capacity Around The Next Generation Mathematics Learning Standards in Grades 3-8

Presented by Diana Kolhoff

ESBOCES is excited to present a professional learning opportunity for participants to actively engage in discussion and collaborative practices surrounding capacity building of the Next Generation Mathematics Learning Standards (NGMLS) as we continue phase two of the transition to the NGMLS. This workshop will provide participants the opportunity to engage in classroom instructional strategies as well as determine changes needed to ensure classroom instruction is research-based and aligned with the standards. Through this experience, participants will leave with a deeper understanding research based teaching practices and will be prepared to make changes in their own classrooms.

As a high school math teacher in Utah, Connecticut and New York, Diana has had the opportunity to teach in many different school settings. After taking a break to start a family, she made the decision to leave the classroom to increase her impact on education by becoming a Mathematics Education Consultant. Her first few years as a consultant, she dove deep into turnkey trainings with the NTI Training Team and the NYS Statewide Mathematics Initiative, and intensively studied the standards to map out acceleration pathways. Currently, she is working with schools in New York and Los Angeles, helping them improve teaching and learning. Due to her rich experiences and self-reflective nature, Diana has become highly effective at teaching math content to teachers while being a role model in best pedagogical practices. She has developed frameworks and protocols to help teachers at all levels improve teaching and learning outcomes. She has a unique way of connecting with teachers and helping them see the vision behind great mathematics instruction.
