PHOTOGRAPHY

If you are interested in learning the nuts and bolts of exposure, aperture, shutter speed and ISO then this is the class for you! Aperture and depth of field are critical concepts that are discussed in depth. You will explore composition techniques and subject placement to give you a more professional look in your photos. The lecture on lighting covers natural and artificial light and how to get the most out of it. You will learn all about low light photography and how to get great images in low light conditions. There is also a field trip to one of the largest photo studios and one of the largest digital labs on Long Island. Care and use of the digital camera and all related equipment will also be covered. Home photo assignments will be given. 15 classes

CDP1010
