COVID-19 Bulletin

August 12, 2020

Staff Taking Temperatures New Health Requirement at ESBOCES

Per updated NYS Department of Health Guidance, beginning on September 1, 2020, all ESBOCES staff will be required to attest that they have a temperature of less than 100 degrees prior to entering an ESBOCES building. If your temperature is not less than 100 degrees, then you need to stay home, advise your supervisor, and follow the Department of Health protocols, which can be found at:

<https://suffolkcountyny.gov/Departments/Health-Services/Health-Bulletins/Novel-Coronavirus>

Each employee will be provided with a thermometer, which will be available at your building. Should you forget to take your temperature before leaving home, a small quantity of single use disposable thermometers will be available at each main entrance.

Please note that all guests and visitors will also be required to attest that their temperature is less than 100 degrees before they are permitted to enter an ESBOCES building.

If you have any questions, please contact COVID-Qs@esboces.org.
